Art Unit:

1. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention for the reasons set forth in the previous office action.

2. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Steven for the reasons set forth in the previous office action.

Specifically to the new limitation added to claims 1 and 6, such fail to positively distinguish over Stevens. Stevens clearly shows "one or more projections" in fig. 1. The subsequent phrase "for contacting a bowling ball" is considered a mere statement of intended use and carries little weight to distinguish over the structure shown in the applied art. Applicant further added that the projections have a "desired configuration such that when force is exerted by [a] bowler on [a] ball, the projections flatten..." While it can be argued that one is not certain of the material of the projections in Stevens, it is clear that they are not rigid since they are intended to be used on brushing teeth which would require some degree of softness. It follows that placing force on the projections of any type of brush by an object (such as a bowling ball) would force them to flatten in compressed and/or bent over fashion.

3. Applicant's arguments filed 11/16/98 have been fully considered but they are not persuasive.
